|---|--|-------|------------------|
| NAME Michael T. McMahon | POSITION TITLE Assistant Professor of Radiology | | |
| eRA COMMONS USER NAME (credential, e.g., agency login) McMahonMT | | | |
| EDUCATION/TRAINING (Begin with baccalaureate or other initial professional education, such as nursing, include postdoctoral training and residency training if applicable.) | | | |
| INSTITUTION AND LOCATION | DEGREE (if applicable) | MM/YY | FIELD OF STUDY |
| University of Richmond, Richmond, VA | B.Sc. | 1993 | Physics |
| University of Illinois at Urbana-Champaign | Ph.D. | 1999 | Chemical Physics |

A. Personal Statement

During my career I have focused on NMR/MRI technology, both pulse sequences and theory. This includes calculation of NMR properties (such as chemical shift, dipolar coupling, chemical exchange rate) using density functional theory, molecular mechanics, density matrix theory and Bloch equation simulations. The current proposal is on the design of CEST detectable drug delivery vehicles for MRI based monitoring of delivery and release of drug. My work over the past six years has focused on CEST contrast agents, and includes publications on the design of new peptide CEST contrast agents through optimization of the exchange rates of NH, NH₂ and OH protons, on the development of experiments to both quantify chemical exchange rates (QUEST/QUEST) and screen compounds for CEST contrast quickly, tune liposomes to maximize their CEST contrast, and on development of imaging schemes to detect CEST contrast agents robustly both *in vitro* and *in vivo*. For this project, I will have the overall responsibility for the MRI acquisition and data analysis for the animal and cell studies to be performed at KKI.

B. Positions and Honors

Positions and Employment

1993-95 Graduate Assistant, University of Illinois at Urbana-Champaign
1995-98 Graduate Fellow, University of Illinois at Urbana-Champaign
1999 Graduate Assistant, University of Illinois at Urbana-Champaign
Advisor: Eric Oldfield, Professor, Department of Chemistry and Biophysics
1999-01 Postdoctoral Associate, Massachusetts Institute of Technology
2001-03 NIH Postdoctoral Fellow, Massachusetts Institute of Technology
Advisor: Robert G. Griffin, Director, Francis Bitter Magnet Laboratory
2003-06 Research Associate, Radiology, Johns Hopkins Univ. School of Medicine
2003-06 Research Associate, Kennedy Krieger Institute
2006 Assistant Professor, Radiology, Johns Hopkins Univ. School of Medicine
2006- Assistant Professor, Kennedy Krieger Institute

Awards Honors

1995-98 NIH Cellular and Molecular Biophysics Training Grant Fellowship
2001-03 NIH/NIGMS Postdoctoral Fellowship
2006-11 NIH/NIBIB K01 Career Development Award,

Memberships, Committees, Boards

2003 Member, International Society for Magnetic Resonance in Medicine (ISMRM)
2005 Member, ISMRM, Molecular Imaging Study Group
2005 Member, Society for Molecular Imaging (SMI)
2008 Molecular and Cellular Imaging Study Group Poster Award Committee, ISMRM
2010 Program Director-Elect, Molecular Imaging Study Group, International Society For Magnetic Resonance in Medicine

C. Selected Peer-reviewed Publications

Most relevant to the current application

D. Research Support

Ongoing Research Support

2P50CA103175-06A2 (Bhujwalla)
NCI JHU ICMIC Program

09/22/11 - 07/31/16

This center grant funds an *in vivo* Cellular and Molecular Imaging Center at Johns Hopkins. The program consists of four research components, four developmental projects, one career development award and four resources.

1R01EB012590-01(McMahon)

09/22/10-08/31/14

NIBIB

DIACEST Islet Cell Capsules for Immunoprotection, MR Detection, and pH Sensing

The goal of this project is to identify cell capsules for the protection of the immune system, use for MR detection and pH sensing.

Completed Projects Within Last Three Years

K01 EB006394 (McMahon)

08/01/06-7/31/11

NIBIB

Developing New Multicolor Polypeptide MR Contrast Agents for Stem Cell Tracking

The goal for this project is to identify new contrast agents to be utilized in stem cell tracking.

R21 EB008769-01A1 (Gilad)

06/01/09-05/31/11

NINDS

Imaging of gene delivery in the central nervous system

The goal of this project is to explore gene delivery imaging in the central nervous system.

R21 NS065284 (Gilad)

02/15/2009-02/15/11

NINDS

Monitoring Neuronal Activity and Inducible Gene Expression using MRI

The goal of this project is by using MRI, monitor neuronal activity and inducible gene expression.
